

## Pine Tar Oil

### Description

|                  |                   |
|------------------|-------------------|
| Chemical Name    | Pine Tar Oil      |
| CAS No           | 8011-48-1         |
| Molecular Weight | -                 |
| Function         | Softening Solvent |
| Colour           | Dark Brown        |
| Physical Form    | Liquid            |

### Specification

| Parameter                       | Unit     | Specification |
|---------------------------------|----------|---------------|
| Engler viscosity, (100ml, 85°C) | s        | 250 – 350     |
| Ash Content                     | %        | Max 0.50      |
| Volatilize content              | %        | Max 6.00      |
| Water                           | %        | Max 0.50      |
| Acidity (count on acetic acid)  | %        | Max 0.30      |
| Acid Content                    | mg KOH/g | Max 2.8       |
| Mechanical Impurity             | %        | Max 0.03      |
| Gravity                         | D        | 1.01 – 1.06   |

### Packing

Steel Drum Or Plastic Drum in 200kg net weight
